FOREWORD BY COUNCILLOR JENNY LAING AND CHIEF SUPERINTENDENT CAMPBELL THOMSON

Our vision is of Aberdeen as **‘a place where all people can prosper’**. The Local Outcome Improvement Plan (LOIP) sets out a ten year plan for how Community Planning Aberdeen will realise this vision by 2026 in Partnership with local people, places and communities.

The LOIP was first developed by the Partnership in 2016 and, almost two and a half years later, Community Planning Aberdeen has been reflecting on how far we have come in achieving our vision? This was the question we posed ourselves at our [‘Taking Stock’](#) event in September 2018 where we considered the evidence available to us: data from our Population Needs Assessment 2018, two years’ worth of performance data against our improvement aims, and feedback from our citizen’s panel and place standard. A summary of some of our key achievements can be viewed in our [‘Taking Stock’ video](#).

So, what do we know? Our data shows some indication of an improving economic situation over the last two years. There has been an increase in hotel occupancy from 56.6% to 62.5% and city centre premise occupancy rates have increased to 90.8%. The number of new jobs being created from inward investment projects has increased alongside a 14% increase in business gateway growth companies being accepted into Scottish Enterprise’s Growth pipeline. Business gateway start up numbers have also increased by 6%. We expect to see further improvement in our economic data in the months to come as a result of our efforts to rejuvenate the City Centre and the major infrastructure developments taking place, such as the refurbishment of Aberdeen Art Gallery and The Events Complex Aberdeen.

The prominence of the oil and gas industry in Aberdeen leaves the City vulnerable to the effects of the economic decline - job losses, falling property prices and loss of custom, all at risk of further decline with the upcoming Brexit. Unsurprisingly, we continue to identify improving the economy as a key priority for Community Planning Aberdeen in this refreshed LOIP with the introduction of two stretch outcomes to improve inclusive economic growth and increase the number of people earning the Living Wage.

Our aspirations go far beyond continued financial success. The word prosperity used throughout this plan refers to the ambition of the Partnership to see all people, families, businesses and communities do well, flourish and succeed. This means supporting people to enjoy positive outcomes throughout the stages of their life.

By ensuring that all people in Aberdeen have the opportunity to prosper we promote the wellbeing and equity of our citizens and prevent a series of intractable problems for the future. Investing in **early intervention and prevention** is a core principle of Community Planning Aberdeen which underpins every decision, action and impact. The ultimate expression of this is our commitment to invest in our children and young people. Our status as the first Scottish City to be accepted onto UNICEF’s Child Friendly Partners Programme reflects our ambition for Aberdeen to be a place where all children and young people have the opportunity to reach their potential regardless of their background and circumstances.

Enabling our families to ensure their children are safe, healthy and nurtured is fundamental to giving children the best start in life. However, our data shows that there are children in Aberdeen who are not getting this start. This has a detrimental impact on their ability to meet their developmental milestones, significantly limiting their future potential.

Our data shows that the attainment gap between the highest and lowest achieving 20% is narrowing, but we need to do more to help all children and young people to achieve. In most subjects and stages, achievement of expected levels is lower in Aberdeen than Scotland. This is especially true for our care experienced children and young people. 90.8% of young people in Aberdeen are now entering positive destinations upon leaving school, however this is not the case for those young people from our deprived areas with only 83.6% moving on to a positive destination.

We know that to achieve real and lasting change in our society, we need to empower communities to help themselves and community empowerment is a central theme which runs throughout our LOIP. But there are members of society who are vulnerable and at times need more support to keep safe from harm. This is equally true of children, young people, adults and older people. Over the last two years we have taken steps to protect a wide range of vulnerable people. For example, we launched the Choose Life app which reached 22,000 users between March 2016 to August 2017. During this time Grampian has seen a 28% decrease in suicide during 2016 compared to an 8% increase nationally.

However, we want to do more for our children and young people, and this includes introducing a different model of care to improve access to Child and Adolescent Mental Health services. Only 37.7 %

of Child and Adolescent Mental Health (CAMHS) referrals in Grampian are seen within the target 18-week period compared with 77.5% in Scotland. This is based on a traditional model of hospital care. Our new approach means many children's detailed assessments and treatment plans are in place after 6 weeks, and the full pathway in place after a total of 15 weeks – better than the national standard.

Some of our best examples of partnership working can be seen in our work to improve community safety outcomes. We've seen an 8% increase in the percentage of people who reported that they feel safe in the City since last year alongside a 17% reduction in overall crime and a reduction in violent crime, the number of young people accused in relation to multiple CrimeFiles also decreased by 48% in the last two years. New schemes such as AMPED, which aims to divert young people from antisocial behaviour; and the alcohol misuse referral scheme, which signposts people with alcohol issues to support and recovery services, aim to tackle some of our most persistent community safety issues at their root cause. We also started our Priority Families Service in January 2017, which offers intensive help through Partnership working to families affected by anti-social behaviour, offending and wellbeing issues. Already we are seeing evidence that families involved are experiencing improved outcomes with 40% of pupils from supported families showing improved attendance and a 76% reduction in criminal charges for families. We hope to spread the positive impact of these initiatives further across the City to help young people and vulnerable adults escape a path of self destruction. For example, drug related deaths have doubled since 2014 in the city and 27% of adults in Aberdeen drink above the guideline recommendations of 14 units per week, higher than Scottish rate of 25%. We have therefore introduced a key stretch outcome to reduce drug and alcohol related deaths in the city.

Early detection and intervention of people at risk of harm continues to be of upmost importance for the Partnership and our improvement efforts continue to focus on how we can improve the shared intelligence between our organisations to support this to happen. For example, data analytics to predict events from potential child protection issues, to the likeliest locations for house fires and school attainment. These insights will give us the ability to take a preventative approach, putting in place interventions to try and stop problems rather than providing costly services in response.

The population needs assessment shows wide divisions in health and life expectancy between the richest and the poorest communities in our City. People living just a few streets apart in some areas of Aberdeen find themselves with life expectancies more than 14 years apart, we have committed to address this through a stretch outcome to increase the healthy life expectancy for the people of Aberdeen. A families ability to nourish themselves is a key factor in healthy life expectancy and it is alarming that 8% of respondents in our last City Voice survey reported that there was a time during the last 12 months when they were worried they would not have enough food to eat, with 3% reporting that their household had run out of food at some time over the last year. Helping people affected by household food insecurity is therefore a key focus for the Partnership. We hope to be able to see a future improvement in the data as a result of initiatives being put in place now; such as free school meals during holidays in our priority localities and supporting communities to grow their own food.

The successes we have experienced so far have not been achieved by partner organisations alone. More and more we are reaching out to our people and communities for their help to improve outcomes. Participatory budgeting is an approach we are using to give people a direct say in how and where public funds can be used to address local needs. We have also been involving communities in our improvement projects which are testing new ways of working using existing resources.

There has been a power of work across the Partnership which needs to be acknowledged and celebrated, but there is still so much to be done. The data has allowed us to make an honest appraisal of where Aberdeen is as a City and where the Partnership is in terms of meeting the needs of our communities. This refreshed LOIP refocuses the Partnership on those critical issues through our 15 new stretch outcomes which communicate what will be different by the end of this ten year plan. This marks a maturing of how we are working together and in partnership with our communities. It signals our joint commitment, confidence and ambition to achieve our vision of Aberdeen as a place where all people can prosper.

As we embark on the next stage of our improvement journey, we will be working even more closely together. There is no doubt that we face complex challenges ahead, but Community Planning Aberdeen is committed to tackle these head on. The opportunities are great, and it is only by recognising these challenges and working together that we will be able to continue to improve outcomes for the people of this great city.

THE ABERDEEN CONTEXT

Like all areas of Scotland, public services in Aberdeen are facing increasing demand with reducing resources. In order to understand how best to prioritise our shared resources, we need clarity on the current and future needs of local people in Aberdeen. Our approach to [Population Needs Assessment](#) ensures we systematically analyse data across a broad range of indicators to identify the major issues facing the City. The following paragraphs provide a summary of findings from the most recent data available as of November 2018.

Our Economy

Aberdeen remains a competitive and productive city with GVA (Gross Value Added) per head in Aberdeen being the highest in Scotland. Average income and earnings are also high with gross disposable household income per head in Aberdeen being £22,508 compared to £18,231 for Scotland, and workplace based hourly pay (median gross) in Aberdeen being £15.33, compared to £13.98. The proportion of our working-age population who are economically active is higher than the Scottish average (79% compared to 77.5%), as is the proportion of our workforce who are qualified to NVQ4 and above (52% compared to 44%). In 2016 there were 1,160 new businesses in Aberdeen. The five-year survival rates of 2012 business births was 45.9% in Aberdeen compared to 43.7% in Scotland. Overall, Aberdeen remains a relatively affluent city - based on SIMD 2016, 40% of Aberdeen's data zones are in the 20% least deprived areas of Scotland.

However, there remain areas of deprivation, with 8% of Aberdeen's data zones being classified as being in the 20% most deprived areas of Scotland. Similarly, despite high average earnings, annual income varies by neighbourhood ranging from a low of £18,596 to a high of £61,570 - almost 15% of adults who work in the city earn less than the Living Wage. 16.7% of children are currently living in poverty. There are also indications that people in some of our communities may have issues with food security as recent reports from CFINE show a large increase in the number of people requiring emergency food parcels.

Our People (Children and Young People)

In 2017 there were 34,495 children (0-15 years) in Aberdeen City – this equates to 15% of the City's total population which is slightly lower than the Scottish figure of 16.9%. In September 2017 there were 13,923 primary school pupils and 8,667 secondary school pupils in Aberdeen City. In July 2017 there were 590 Care experienced children and young people in Aberdeen City – equivalent to 1.6% of the 0-17 years population (compared to 1.4% in Scotland). Almost half (49%) of Care Experienced Children and Young People (CECYP) in Aberdeen live in foster care. While improved, as in Scotland the attainment outcomes for CECYP are still lower than those for all pupils. In 2016/17 in Aberdeen City 74% of CECYP left school with 1 or more qualification at SCQF (Scottish Credit and Qualifications Framework) level 4 (78% for Scotland). In 2017, a total of 1,212 CAMHS (Child and adolescent

mental health services) patients were seen in Grampian. Of these, 37.7% were seen within the target 18-week period, compared to 77.5% in Scotland. However, this is based on a traditional model of hospital care. A new approach means many children's detailed assessments and treatment plans are in place after 6 weeks, and the full pathway in place after a total of 15 weeks which is better than the national standard.

Our People (Adults)

The population of Aberdeen is currently 228,800 and is projected to increase by 3.2% between 2016 and 2026 to 237,169. Aberdeen has a relatively young population. Compared to Scotland the proportion of working-age people is higher (69% compared to 64%) and the median age is lower (36 years compared to 42 years). We have a diverse city with 24% of the City's population having been born outside of the UK compared to 9% for Scotland. Estimated life expectancy at birth in Aberdeen is in line with Scottish averages at 80.8 years for females and 76.4 years for males (81.1 years 77.0 years respectively for Scotland). However, as in Scotland, life expectancy is strongly associated with deprivation, with those in the most deprived areas having a lower life expectancy than those in the least deprived areas. Healthy life expectancy (years lived in good health) is lower at 65 years for males and 67.4 for females. There is a mixed picture in relation to health behaviours. Positive signs are lower than average rates of smoking during pregnancy and higher than average rates of active travel. However, in the period 2013-2016, 27% of adults in Aberdeen City were drinking above the guideline recommendations of 14 units per week. This is slightly higher than the rate for Scotland of 25%. Also, it is estimated that 1.9% of Aberdeen's population have a problem drug use. At 0.17 per 1,000 population, Aberdeen has the 4th highest average annual rate of drug deaths (after Dundee City at 0.25, Glasgow City at 0.24 and Inverclyde at 0.22) of all local authorities in Scotland. In

2016/17 15.4% of people in Aberdeen City were prescribed drugs for anxiety, depression or psychosis. While lower than the national rate (18.5%), consistent with trends in Scotland the proportion of people receiving prescriptions for these conditions has increased significantly in recent years, from 12.5% in 2009/10 to 15.4% in 2016/17. In Aberdeen, in 2017 there were 470 people aged 65+ years with high levels of care need who were cared for at home (i.e. who received 10 and more hours of home care purchased or provided by the local authority). This equates to 26% of all people in this age group with high levels of care need – significantly lower than the Scottish average of 35.2%.

Our Place

Aberdeen has the 8th largest local authority population in Scotland. The city is made up of 37 neighbourhoods, 9 of which are recognised as deprived based on Scottish Index of Deprivation (SIMD). In 2017 there were 116,821 dwellings in Aberdeen with local authority housing stock totalling 22,041, of which 75.8% are flats. Between 2016 and 2017 the total waste generated in Aberdeen fell by 8.7%, and in 2017 – for the first time – more waste was recycled (44%) than went to landfill (36%). Overall in Scotland 46% of waste generated was recycled and 45% went to landfill. In 2014 CO₂e (carbon dioxide equivalent) emissions in Aberdeen totalled 1,532,256 tonnes, down 18% from 1,867,497 tonnes in 2005. Between 2005 and 2014, per capita CO₂e emissions have fallen in both Aberdeen and Scotland. Four areas in Aberdeen have been identified as potentially vulnerable to flooding – Deeside, Peterculter, Bridge of Don and Denmore. Total annual average damages due to flooding in 2016 was estimated at £17,370,000, equivalent to 80% of annual average damages for the North East Local Plan area.

The Partnership's response to these challenges is set out in this Local Outcome Improvement Plan which details the improvement activity the Partnership will prioritise and resource to effect change.

OUR VISION FOR ABERDEEN CITY

‘A place where all people can prosper’

Our vision for 2026 is Aberdeen as a place where all people can prosper. This means all people being able to access the opportunities available in our great City, regardless of their background or circumstances. This reflects our desire to help all people, families, businesses and communities to do well, succeed and flourish in every aspect. To achieve this vision we are committed to tackling the issues that exist in our society which prevent equal opportunity for all to lead a happy and fulfilling life.

Despite the relative prosperity that Aberdeen has enjoyed compared to other areas of Scotland, there are problems faced by our City which have endured for decades and have been stubbornly resistant to improvement. Our evidence confirms what we already know; that inequalities in health, education and employment opportunities continue to exist in some communities and that this is most acute for those families living under the grip of poverty.

Through early intervention and prevention, we aim to create the conditions for prosperity and support future generations to be prepared and made **ready for school, for work, for adulthood** and for life itself – see diagram 1. This calls for attention to be paid to care experienced children, young offenders, children of offenders and those living in poverty - because their levels of risk are very much higher than those of other children and young people of their age.

Diagram 1 – Whole life approach

No single sector or profession can improve outcomes for people and place alone, collaborative efforts across the Community Planning Partnership are key to achieving our ambitions the City of Aberdeen.

We also understand that real transformation will come from acting beyond the walls of our public service organisations and infrastructures and thinking about Aberdeen as a **‘City of Learning’**.

Becoming a **City of Learning** means capitalising on the vast opportunities, resources and potential for enabling people to learn and develop themselves in ways that meet their needs, interests and ambitions. In this way they can participate more fully in their own lives and in the life of the City to help their families and communities prosper. This approach builds on the pioneering work of the Learning Cities in the USA and the UNESCO Global Network of Learning Cities movement. It recognises the lifelong opportunity that exists for people to learn to address gaps in their opportunity, achievement and/or skills – see diagram 2.

Diagram 2 – Lifelong learning approach

How will we know we are making a difference?

Setting out a vision for how we want things to be in the future is the easy part. Believing that it is possible and making it happen is entirely different.

This plan sets out the many improvement projects we will take forward to achieve our vision as **a place where all people can prosper**.

Our ultimate measures of success in achieving this vision will be that **by 2026:**

- We still have the highest GVA (Gross Value Added) per head in Scotland
- Fewer than 10% of our children are living in poverty
- We are living in good health for at least five years longer
- Our carbon emissions are 42.5% lower

How will we make it happen?

Our 15 Stretch Outcomes break down our overall vision for the People, Place and Economy of Aberdeen into manageable thematic programmes of work. In taking a structured approach to improvement we are very clear about what it is we are trying to accomplish, how we will know whether a change is an improvement and what changes we will make to secure this improvement. These stretch outcomes tackle poverty as they manifest at every stage of a person's life journey.

OUR 15 STRETCH OUTCOMES

ECONOMY	PEOPLE (Children & young people)	PEOPLE (Adults)	PLACE
<p>1. 10% increase in employment across priority and volume growth sectors by 2026.</p> <p>2. 90% of working people in Living Wage employment by 2026.</p>	<p>3. 95% of children (0-5years) will reach their expected developmental milestones by the time of their child health reviews by 2026.</p> <p>4. 90% of children and young people will report that they feel mentally well by 2026.</p> <p>5. 95% of care experienced children and young people will have the same levels of attainment in education, emotional wellbeing, and positive destinations as their peers by 2026.</p> <p>6. 95% of children living in our priority localities will sustain a positive destination upon leaving school by 2026.</p> <p>7. Child Friendly City which supports all children to prosper and engage actively with their communities by 2026.</p> <p>8. 25% fewer young people (under 18) charged with an offence by 2026.</p>	<p>9. 25% fewer people receiving a first ever Court conviction each year by 2026.</p> <p>10. 2% fewer people reconvicted within one year of receiving a community or custodial sentence by 2026.</p> <p>11. Healthy life expectancy (time lived in good health) is five years longer by 2026.</p> <p>12. Rate of harmful levels of alcohol consumption reduced by 4% and drug related deaths lower than Scotland by 2026.</p>	<p>13. No one in Aberdeen will go without food due to poverty by 2026.</p> <p>14. Addressing climate change by reducing Aberdeen's carbon emissions by 42.5% by 2026 and adapting to the impacts of our changing climate.</p> <p>15. 38% of people walking and 5% of people cycling as main mode of travel by 2026.</p>

The following chapters in this document include the detailed improvement projects we will take forward to achieve these stretch outcomes.

PROSPEROUS ECONOMY

The North East of Scotland is one of the most active and prosperous regions in the UK. However, in looking at the region's future economic development, it is clear that Aberdeen needs to be at the heart of a city region that competes with international city regions and not just with others in Scotland or the UK.

Economic activity in the North East is strong, principally because of North Sea oil and gas and, in spite of the recent downturn, there remain significant opportunities to sustain and grow activity in this sector in both the short and longer terms. The Aberdeen Economic Policy Panel Report in November 2018 provides an independent analysis of the Aberdeen City Region economy to support the Council's annual credit rating assessment by Moody's. The report confirms that some challenges the North East region faces are specific to the local economy (such as the trends in future oil production/price). The immediate focus is on maximising economic recovery from the remaining oil and gas reserves in the UK Continental Shelf while anchoring expertise in the wider energy sector in the North-East of Scotland.

In 2016 Aberdeen was ranked fifth in the UK in terms of the number of patents per 1,000 population, testimony to a variety of internationally significant research centres in the

POPULATION NEEDS ASSESSMENT DATA:

Median weekly pay (full-time workers)

Percentage of people (16-64 years) in employment

Business births per 10,000 population

Number of VAT registered enterprises

PWC City Growth Index

Number of FDI Projects

Percentage of population economically active

Percentage of 16-19 year-olds participating in employment, education or training

Average hotel occupancy rates

region, such as the National Subsea Research Institute, the Rowett Institute of Nutrition and Health, the Marine Lab, the James Hutton Institute and Aberdeen's two universities. New business creation is vital in diversifying the economy and the correct support for those wishing to start or expand their own business is essential.

Key to this transition is retention of the talent and transferable skills that currently exist within our businesses and educational institutions. In addition to creating a strong pipeline of talent through our schools, college and universities, we must ensure that inclusive growth is at the heart of all we do and that opportunities are open to all by offering support to those seeking to enhance their skills or reskill to move into new roles. We will seek to develop a City of Learning approach that empowers people and communities to put lifelong learning at the heart of their civic and cultural identities.

The purpose of Aberdeen Prospers is to contribute to the inclusive economic growth agenda in the city and Brexit may have significant impacts across communities and localities that we are focussed on. Even in the best-case Brexit scenario, recent forecasts from the Bank of England and other agencies suggest 'lost' growth of 3% per year and the stretch outcome aims for Aberdeen Prospers should be considered in that light. The potential (and future real) consequences of Brexit will continue to be monitored by the Aberdeen Prospers group, which will retain sufficient flexibility and agility in its improvement planning to accommodate actions to mitigate Brexit consequences for priority communities and groups, where possible. Aberdeen Prospers will also explore potential opportunities afforded by Brexit and work these into growth related improvement activity where possible and appropriate to do so.

A primary focus of Aberdeen Prospers will be on delivering on Fair Work and Good Work principles – ensuring that people who are least engaged with the labour market or who benefit least from the city's prosperity are given the opportunities to progress into sustainable employment. Working with locality partnerships will be critical to achieving our ambitions in this area.

By working in partnership we aim to ensure Aberdeen's economy continues to be prosperous. As part of an inclusive economy, Aberdeen's 3rd sector provides a significant contribution in financial and resource terms. Its turnover is £350 million per annum (excluding the two universities, college and two ALIOs). The workforce is in excess of 10,000 and it pulls in the support of over 70,000 volunteers for the city's benefit. It reflects the diversity of the population in age, gender, ethnicity, faith and ability, providing a purpose for all.

STRETCH OUTCOMES

1. 10% increase in employment across priority and volume growth sectors by 2026.
2. 90% of working people in Living Wage employment by 2026.

Stretch Outcome	Key Drivers	Improvement Project Aim	Key Improvement Measures
1. 10% increase in employment across priority and volume growth sectors by 2026 (Baseline data 2017: 48,390 people in employment in growth sectors. A 10% increase is 4,839 people.) Responsible Outcome Improvement Group: Aberdeen Prospers	1.1 Diversification of the economy into other growth sectors including wider energy related sectors; tourism; food and drink; life sciences; health and social care and construction.	Increase the number of people employed in growth sectors (digital/ creative; food and drink; life sciences; tourism; social care and health and construction) by 5% by 2021.	No. of people employed by growth sector (Baseline data 2017: Digital/ creative – 4,040; Food and drink – 1,250; Life sciences – 900; Tourism – 10,000; Early years – 2,570; Health and social care – 23,630; Construction – 6,000)
	1.2 Developing the talent and future workforce necessary to support diversification of businesses and economy.	Stimulate a 5% increase in the number of start-up businesses in growth sectors (digital/ creative; food and drink; life sciences; tourism) by 2021.	No. business start-ups by growth sector
			% business start-ups surviving after five years by growth sector
			No. of businesses by growth sector (Baseline data 2017: Digital/ creative – 855; Food and drink – 130 Life sciences – 30; Tourism - 535)
			GVA per worker by growth sector (Baseline data 2016: Digital/ creative – £51,064; Food and drink - £68,579; Life sciences - £97,136; Tourism - £22,921)
			No. business uptake of Scottish Enterprise support
			No. of Scottish Enterprise account managed companies
		Increase the number of Modern and Graduate Apprenticeships in priority and volume growth sectors by 5% by 2022.	No. apprenticeships starts by growth sector
			No. apprenticeships available by growth sector
			No. of inward investment enquiries generated by priority growth sector

Stretch Outcome	Key Drivers	Improvement Project Aim	Key Improvement Measures
	1.3 Improving investment into Aberdeen and Aberdeen businesses.	Increase the number of people within Aberdeen City qualified with ICT and Digital skills at SCQF Levels 7 and 8 by 10% by 2024.	No. of SCQF Level 7 and 8 qualifications achieved in ICT and digital subject areas
		Support 2 investments per year in priority growth sectors through Invest Aberdeen by 2022.	% of enquires resulting in investment
			No. of jobs created through Foreign Direct Investment
			Total turnover by growth sector (Baseline data 2016: Food and drink – N/A; Life sciences – £90.2 million; Tourism – £424.6 million; Creative/digital – N/A)
		Increase the number of people from priority localities employed by public sector partners and in major capital projects by 2022.	No. of companies engaged in exporting activities for the first time or in markets that are new to the company
2. 90% of working people in Living Wage employment by 2026 (Baseline data 2018: 85.8%) Responsible Outcome Improvement Group: Aberdeen Prospers	2.1 Promoting inclusive economic growth for our most disadvantaged communities.	Increase no. of people over 50 in employment in Aberdeen by 10% by 2021.	No. of people in low-skilled, low-paid and insecure employment
		Increase the number of people from priority groups (care experienced young people, people with convictions, people with housing need) employed by public sector partners by 2021.	No. of over 50s people in employment
			No. of people from priority groups employed by public sector partners
		Increase employer sign up to the Real Living Wage by 2021 and year on year to achieve Real Living Wage City Status by 2026.	No. of people in low-skilled, low-paid and insecure employment
			No. of employers paying the Real Living Wage

Stretch Outcome	Key Drivers	Improvement Project Aim	Key Improvement Measures
		Increase the impact and measured value of Partnership wide community benefits programme by 2022.	Value of Partnership wide community benefits programme
			No. of community groups participating in co-design of community benefits
		80% of young people will successfully complete their Modern Apprenticeship programme by 2022.	% of those achieving a modern apprenticeship of all those leaving an MA (Baseline data 2017: 75% - Aberdeen City and Aberdeenshire)
			No. of young people on foundation apprenticeships
			% of young people achieving positive destinations post-school (Baseline data 2017: 89.4%)
			% of employers reporting skills gaps (Baseline data 2017: 14%)
	2.2 Ensuring access for all employers to skilled labour.	90% of employers reporting that they have appropriately skilled people in their workforce by 2026.	Educational attainment at NVQ4 and above of resident population aged 16-64 (Baseline data 2017: 51.7%)
		Increase the number of people entering employment from Stage 4 employability activity to 80% by 2021.	% of people entering employment from six skills academies within 13 weeks of completion (Baseline data 2017: 12% - 21%)
			No. of people entering employment from stage 4 employability activity
		Increase the % of people in Aberdeen who feel comfortable using digital tools by 2021.	% of public service employees with a standard level of digital skills
			% of school leavers and students who have high levels of digital skills
			% of citizens who feel comfortable using digital tools

PROSPEROUS PEOPLE (CHILDREN & YOUNG PEOPLE)

Investment in children is one of the best and most valuable long-term investments we can make. Investing shared resources to target early intervention and prevention for children and young people is central to tackling inequality and improving life chances.

Our ambition is to support every child, irrespective of their circumstances, to grow, develop and reach their full potential. We want Aberdeen to be a city where there is equality of outcomes and opportunities for all our children and young people and that children's aspirations are not limited by their background or circumstances. This drives the Partnership to collaborate to maximise the long-term outcomes of those who need extra care and protection.

Our stretch outcomes reflect the importance we place on supporting equity of access to education, supporting families to provide the best care they can for their children and the need to invest in the health, including mental health, of our children and young people. Critically we want our children to be safe and protected from harm. This agenda will be driven forward by the Child Protection Committee which works in parallel with the Integrated Children's Services Board and, through a reciprocal sharing of information, ensures improvement activity is aligned.

POPULATION NEEDS ASSESSMENT DATA:

Percentage of babies exclusively breast-fed at 6-8 weeks

Percentage of P1 pupils with no obvious tooth decay

Immunisation uptake at 24 months (MMR)

Percentage of P1 children at risk of overweight and obesity

% of Care Experience Children and Young people with 1 or more qualification at SCQF Level 4

Number of children on the Child Protection Register

Percentage of pupils from deprived areas with 5+ Awards at SCQF Level 5

Rate of teenage pregnancies (per 1,000 population)

Number of juvenile offenders

We will also make a particular effort to support our care experienced young people to ensure that they gain the same opportunities as their peers. To support them and our other children at risk, for example children who have had adverse childhood experiences, we will make sure that we put addressing inequality in education and positive destinations at the forefront of our aims. Our work with young people to reduce their involvement in offending behaviour will be through appropriate and effective interventions aimed at supporting them to more positive destinations.

As we work together to deliver the promises we have made in the LOIP we continue to collaborate to achieve UNICEF Child Friendly City status. This programme will enable our children and young people to shape strategic decision making across the Partnership and engender a culture of collaboration in our future community leaders.

STRETCH OUTCOMES

3. 95% of children (0-5 years) will reach their expected developmental milestones by the time of their child health reviews by 2026.
4. 90% of children and young people will report that they feel mentally well by 2026.
5. 95% of care experienced children and young people will have the same levels of attainment in education, emotional wellbeing, and positive destinations as their peers by 2026.
6. 95% of children living in our priority localities will sustain a positive destination upon leaving school by 2026.
7. Child Friendly City which supports all children to prosper and engage actively with their communities by 2026
8. 25% fewer young people (under 18) charged with an offence by 2026.

PROSPEROUS PEOPLE (ADULTS)

All people in Aberdeen are entitled to live within our community in a manner in which they feel safe and protected from harm, supported when necessary and fully included in the life of the city. All citizens are equally entitled to enjoy these aspirations, and it is recognised that people may, at times become vulnerable. People sometimes need others to support their achievement of a full, active, safe citizenship.

We need to reduce the number of people and communities affected or harmed by crime by working with those who get involved in offending behaviour, which can be for a myriad of reasons, including environmental and social factors. Evidence has shown that managing and supporting people who have offended in the community, rather than through short term prison sentences, is more likely to lead to reduced reoffending. Family, social and employment links can be maintained in the community, and individuals can be supported, through appropriate and effective interventions, to turn their behaviour around and become contributors to society.

To improve outcomes for people we need to move away from a fix and treat approach within public sector agencies. We need to focus on anticipation, early intervention, prevention and self-management.

POPULATION NEEDS ASSESSMENT DATA:

% who feel safe and who feel able to participate in decisions

Life expectancy and healthy life expectancy 2009-2013

Mean Wellbeing Score (WEMWBS)

Health behaviours (2014-17 combined)

Number of drug-related deaths

Alcohol-related mortality (per 100,000 people)

Number of deaths from probable suicide

Total crimes recorded by Police

Domestic Abuse Incidents (per 10,000 population)

The key causes of preventable ill health should be tackled at an early stage and be cross sector in approach to create a culture in which healthy behaviours are the norm starting with the early years and persisting throughout our lives. The importance of physical and mental health as well as the need to address underlying conditions which effect health such as social, economic and education can only be achieved by key public and third sector organisations working together.

It is not just about services provided, but what individuals want and those around them- families and carers - we need to design supports for individuals, families and communities. Improving health literacy is a critical empowerment strategy to increase people's control over their health, their ability to seek out information and their ability to take responsibility. Our efforts are to help individuals and communities look after their health, particularly through the choices they make and lifestyles they adopt. Building community resilience will have long term effects on the health of our population, ease the pressure on public services and improve our physical environment. We have paid particular attention to the importance of nature, our environment and socialisation in addressing mental well-being.

Our plans stem from working with nurseries, schools to workplaces and communities – getting people involved, caring and collaborating in looking after themselves, their neighbours and their environment. This includes joined up efforts to respond quickly when individuals and families are in need of support as well as extending efforts to identify where early intervention may be needed.

STRETCH OUTCOMES

9. 25% fewer people receiving a first ever Court conviction each year by 2026.
10. 2% fewer people reconvicted within one year of receiving a community or custodial sentence by 2026.
11. Healthy life expectancy (time lived in good health) is five years longer by 2026.
12. Rate of harmful levels of alcohol consumption reduced by 4% and drug related deaths lower than Scotland by 2026.

			No. of partners providing healthy food outlet provision
			No. of partners providing baby friendly premises and workplaces
			% of people who exercise regularly
		Reduce tobacco smoking by 5% overall by 2021.	No. of people who smoke (<i>Baseline data 2017: women 19%; and men 26%</i>)
			No. of partners who have adopted smoke free ground policies
			No. of partners who have adopted 'smoke free place' policies
	11.5 Working with staff, professionals and employers to provide individuals and communities with the social resources needed to make informed decisions about health and lifestyle.	Increase the number of people who are engaged with citizens in areas which impact on lifestyle and health that are trained in Teachback techniques by 100% by 2021.	No. of partners who have signed the ASH charter for a Tobacco Free Generation
			No. of organisations accessing training in use of the Teachback techniques.
		Increase number of people accessing community based hubs (including digital social hubs) to increase citizens health literacy by 2021.	No. of people trained.
			No. of hubs available (digital and physical)
		Increase by 25% year on year, the number of people who have benefited from a Making Every Opportunity Count conversation or intervention by 2021.	No. of citizens accessing hubs
			% increase in health literacy in Aberdeen City (Baseline to be established by Health literacy measurement tool)
			No. of frontline staff trained in overall MeOC approach
			Numbers of agencies/services trained
		Increase opportunities for people who are retired to continue and increase their contribution to communities by 10% by 2021.	No. of tier 2/3 interventions (e.g. sustained programmes for health literacy, distress brief intervention, alcohol brief intervention) in identified areas of need
			No. of community opportunities for people who are retired
			No. of community developed activities run by retired volunteers
			No. of volunteers who are retired

Stretch Outcome	Key Drivers	Improvement Project Aim	Key Improvement Measures
12. Rate of harmful levels of alcohol consumption reduced by 4% and drug related deaths lower than Scotland by 2026 (Baseline data: 2014-17 – % of people drinking to hazardous/harmful levels Aberdeen – 29% Scotland – 25% 2017 - 3 year average drug related deaths per 1,000 pop: Aberdeen – 0.21 Scotland – 0.16) Responsible Outcome Improvement Group: Alcohol and Drugs Partnership/ Integrated Children Services	12.1 Increase support for children and young people at risk of developing drug and alcohol problems by working with Integrated Children Services	Increase the % of Care experienced children and young people receiving educational and support input on alcohol/ drugs issues by 2021.	% of Care experienced children and young people received educational input
			% of Care experienced children and young people receiving support input
		100% of schools have a progressive, cohesive and relevant substance misuse curriculum by 2021.	% of schools using a progressive framework in evidence
			% of associated school groups with an agreed pathway through progression
			% of schools using relevant and up to date resources
			No. of 15 year olds drinking weekly (SALSUS*)
	No. 15 year olds reporting drug use in the last month (SALSUS*)		
	12.2 Reduce levels of harmful alcohol consumption across the whole population through “making every opportunity count” approaches	Increase % of the population who feel informed about using alcohol responsibly by 2021.	% of population who know what a unit of alcohol is
			No. of community planning partners promoting harm reduction information
		Increase by 10% the percentage of adults in Aberdeen City who are non drinkers or drink alcohol in a low risk way by 2021.	Number of adults regularly drinking14 units of alcohol or less
			Number of adults regularly drinking14 units of alcohol or more
			No of ABIs delivered
			No of ABIs in pregnancy delivered
			Increase the number of people seeking help and advice regarding alcohol consumption from services
			Increase the number of very harmful drinkers entering recovery support
			Number of emergency department presentations / admission for alcohol intoxication
			Number of alcohol related deaths
		Increase the number of alcohol licensed premises awarded Best Bar None status by 2021.	Number of alcohol licensed premises awarded Best Bar None status

Stretch Outcome	Key Drivers	Improvement Project Aim	Key Improvement Measures
	12.3 Enhance early intervention and preventative treatment for those at greatest risk of harm from drugs and alcohol	Increase number of alcohol brief interventions delivered by Primary Care providers and other professionals by 100% by 2021.	No. of people trained to provide alcohol brief interventions
			No. of alcohol brief interventions delivered across key sectors (Baseline data 17/18: Primary care – 2556 Wider setting – 1406)
			No. of alcohol brief interventions delivered in locality areas
			No. of alcohol related hospital admissions
		Increase the uptake of alcohol treatment by improving access to alcohol services and ensuring they are local, integrated and targets areas of greatest need by 10% year on year by 2021.	Increase uptake of alcohol treatment programmes
			Increase uptake of alcohol treatment programmes from locality areas
			No. of alcohol related hospital admissions
			Rate of retention in alcohol treatment/ post detox support
		Reduce the incidence of fatal drug overdose through innovative developments and by increasing the distribution of naloxone by 10% year on year by 2021.	Increase distribution of naloxone for those in / not in treatment
			Total no. of supplies of naloxone made (Baseline data: 17/18 – 2850)
			No. of first supplies made (Baseline data: 17/18 – 1523)
			Repeat supplies (Baseline data: 17/18 – 271)
			% of target population reached (Baseline data: 17/18 – 89%)
			No. of supplies made in locality areas
		Increase opportunities for individuals who have been at risk of Blood Borne Viruses, being tested and accessing treatment by 2021.	No. of people tested
			No. of places that people can access testing for BBVs: <ul style="list-style-type: none"> • Clinical setting • Non-clinical setting • Within substance misuse services
		Increase uptake of drug treatment and specifically within Locality Areas by 10% each year by 2021.	No. of people in drug treatment programmes
			Increase no. of people in drug treatment programmes from locality areas
			Rate of retention in drug treatment and support

Stretch Outcome	Key Drivers	Improvement Project Aim	Key Improvement Measures
	12.4 Increase visibility and support of recovery in our communities	Increase number of people undertaking recovery from drug and alcohol issues who are being supported to maintain drug / alcohol free lives in their community by 2021.	No. of people supported in recovery
			No. of people supported in recovery from locality areas
			No. of recovery support groups

PROSPEROUS PLACE

The place where we live can significantly influence the ability of individuals and communities to live in healthy, sustainable ways. Our environment is therefore integral to the quality of life enjoyed in Aberdeen City and is vital in encouraging the wellbeing of our citizens. We recognize that working to end poverty and other deprivations must go hand-in-hand with strategies that improve health and reduce inequality. Therefore while framing our response to these challenges, we have aligned our aims with the United Nations Sustainable Development Goals which share our vision to create prosperity for people now and into the future.

To support our ambitions we will harness the capabilities of our communities and develop and support efforts to make our green spaces more productive. Our focus will include educational support for gardening, cooking and trading and working to improve food resilience while promoting a holistic approach to health and well-being. We also aim to increase food resilience at individual and community level by establishing self-governing community co-operatives to offer ways of providing food and developing skills in cooking, budget management and employability. This includes establishing sustainable contingency arrangements to support families during times when the chances of food poverty are highest.

POPULATION NEEDS ASSESSMENT DATA:

Use nearest greenspace at least once a week

Satisfaction with nearest greenspace

Percentage who feel part of the community and who feel able to participate in decisions

Per Capita CO2 Emissions (t)

Household waste generated (t)

Percentage of household waste recycled

Percentage who walk or cycle to work

Percentage worried that they would not have enough food or had a limited diet

Street Cleanliness Score

Building strong and resilient communities is vital to achieve our aims and this means building capability in our communities to take more control of their own lives – economically, environmentally and socially. Listening to what matters to our communities in relation to resilience will help us to develop a bottom up approach, encouraging greater ownership and independent action. This will be supported by using and developing partner-wide intelligence, providing user-friendly materials and raising awareness of the resources that are available to help communities think about self-management and community led action. To help achieve our ambitions we aim to increase local food growing and improve access to community pantries by co-ordinating the efforts of multiple partners and volunteers to improve the skills, information and training opportunities available.

A key priority is increasing Active Travel and improving the sustainability of our communities and we will work together to complement the aims of the 'Aberdeen Active Travel Action Plan' by, amongst other things, establishing an Active Travel Hub in Aberdeen by 2021. We will also seek to increase access to successful grant funding opportunities to further support the improvement work of our partners and communities.

STRETCH OUTCOMES

13. No one in Aberdeen will go without food due to poverty by 2026.

14. Addressing climate change by reducing Aberdeen's carbon emissions by 42.5% by 2026 and adapting to the impacts of our changing climate.

15. 38% of people walking and 5% of people cycling as main mode of travel by 2026.

HOW WE WILL ACHIEVE OUR OURCOMES?

By Working Together

Demand for our services are increasing throughout the city, this continues to stretch the public sector, meaning that much provision is diverted to crisis response. It is difficult therefore as individual organisation to provide **early intervention and prevention**.

This is an issue that we all share and the LOIP represents an opportunity for greater joint effort, in order to work towards **early intervention and prevention**; working in partnership we can better help each other to improve outcomes for our citizens. For example, we can develop shared, whole and targeted population campaigns on issues within the LOIP to bolster our improvement efforts. This **whole systems approach** to our **shared leadership** and increasingly closer delivery means that we can capitalise on the knowledge, skills and tools used across the workforce and communities to meet the needs of changing circumstances.

We already have a shared approach to Quality Improvement which is being used by our multi-agency Outcome Improvement Groups to take forward the LOIP improvement projects. We will encourage further **learning and working together** to continue to build a shared approach to delivering real improvement.

We will work across the CPA to build a shared intelligence unit, bringing together our understanding of the needs and data across partners. This will also involve sharing our data, understanding the full picture of our population, analysing and understanding demand more fully. Through regular review and scrutiny we will be able to quickly determine and adapt our services and solutions as we progress to meet changing need.

It is essential to the future of the city that our workforce and citizens have the skills to thrive, can **exploit digital technologies** and can interact using modern tools and platforms in order to ensure that we can more effectively redirect our resources. Our data will become an enabler, supporting and driving the re-design of customer focused services responding to evolving needs and the growing opportunities of digital technologies.

Achieving the ambition of our LOIP is going to require a movement to embed the LOIP across all partners. This will mean the LOIP running through individual partners planning and into individual team and staff objectives. This will be the judgement of real time and skills being deployed to deliver our shared strategy.

Community Planning Aberdeen is the only strategic forum where partners in Aberdeen are able to jointly plan how to deploy **collective resources** to achieve the agreed priorities set out in the Local Outcome Improvement Plan (LOIP). CPA continues to develop its approach to joint resourcing to ensure the LOIP is the focal point for the planning and deployment of resources

To fulfil the LOIP ambition we are going to need to marshal our forces and work together to focus on the right improvement projects. This is going to require a different approach to resource management and a greater sharing of **capability and capacity**.

By Working With Our Communities

Effective engagement with people and communities about how local services are planned and delivered will be integral to how we deliver our plan. Our **Community Empowerment, Engagement and Participation** Strategy ensures we are united in our approach to work with people to help them achieve their aspiration for their communities.

We are committed to becoming a **City of Learning** means capitalising on the vast opportunities, resources and potential for enabling people to learn and develop themselves in ways that meet their needs, interests and ambitions. In this way they can participate more fully in their own lives and in the life of the City to help their families and communities prosper.

It is by focussing on geographies and communities of interest most in need to build **community resilience** that we will achieve better outcomes across our whole city. Our improvement work will be targeted to support these communities initially so we can learn what works for our most vulnerable people before we scale up and spread across the City.

We already have made significant progress through our three priority localities. The focus on these areas will continue to be vital because of their levels of need as demonstrated in our **Population Needs Assessment**. What will be different is the way we wrap services around these areas and build even stronger and more resilient communities.

People can also face barriers because of their race, gender, age, disability, sexual orientation, religion or belief. In delivering this plan, the Partnership will seek to tackle inequality in the city and within individual communities in whatever form it manifests itself, through clear and coordinated approaches. This includes **tackling stigma** in all its forms by working in partnership to take forward behavioural campaigns and explore other ways of promoting positive change in people's attitudes. We need to do this in partnership with local media outlets.

By Working With the Private Sector

Greater opportunities for **Private Sector involvement** in the Local Outcome Improvement Plan will allow perspectives and experiences from this sector to be more widely utilised than they have perhaps previously. Whatever methods used to involve the private sector, the objectives for their involvement in Community Planning Partnerships should be mutually supporting - to ensure that businesses fully contribute to the well-being of local communities and, in turn, that the conditions exist for business to thrive and develop in that community thus benefiting the whole community.

OUR GOLDEN PYRAMID

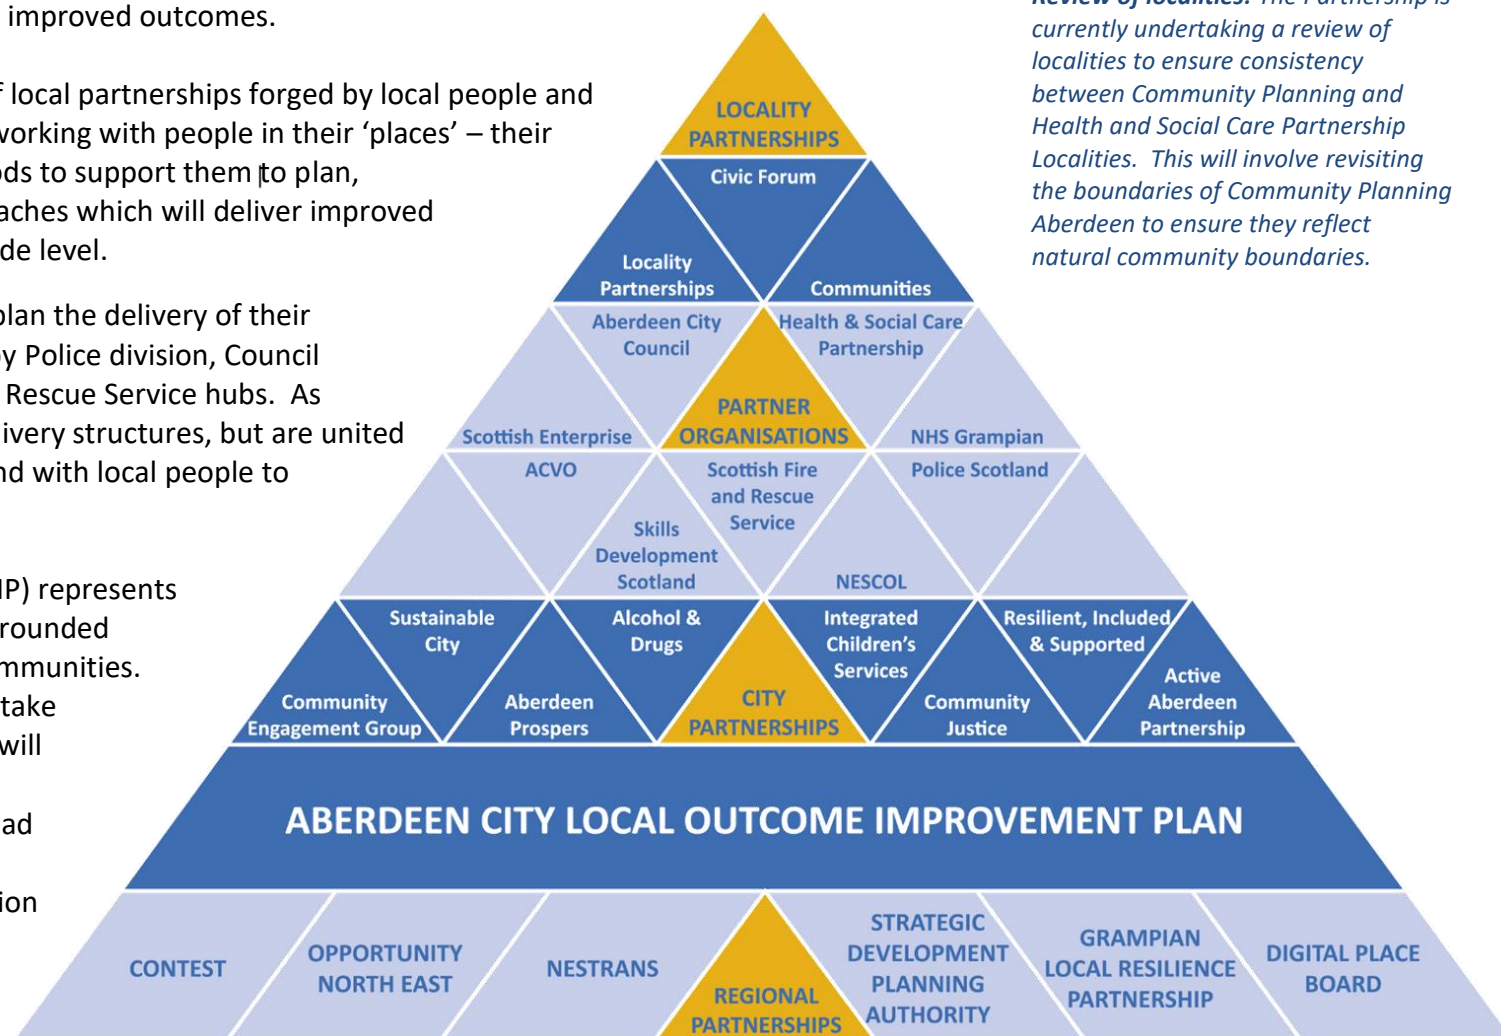

Our golden pyramid depicts our determination to ensure that Community Planning Aberdeen works together as a whole to enable and empower local people, communities and partnerships to be the makers of their own improved outcomes.

Of topmost importance is the realisation of local partnerships forged by local people and local communities. We are committed to working with people in their 'places' – their homes, their streets and their neighborhoods to support them to plan, resource and deliver community led approaches which will deliver improved local outcomes at a community and city-wide level.

Each of the Community Planning Partners plan the delivery of their services in a range of ways. For example, by Police division, Council function, NHS Boards and Scottish Fire and Rescue Service hubs. As partners we accept these differences in delivery structures, but are united in our commitment to working together and with local people to achieve improved outcomes.

This Local Outcome Improvement Plan (LOIP) represents our ambitions city wide, but is very much grounded in the needs of our most disadvantaged communities. It is by working with these communities to take forward our improvement activity that we will learn how we can change, how we can improve and how we can scale up and spread what works. That is how we will make the difference in Aberdeen and achieve our vision of a place where all people can indeed prosper.

Review of localities: The Partnership is currently undertaking a review of localities to ensure consistency between Community Planning and Health and Social Care Partnership Localities. This will involve revisiting the boundaries of Community Planning Aberdeen to ensure they reflect natural community boundaries.

GOVERNANCE & ACCOUNTABILITY

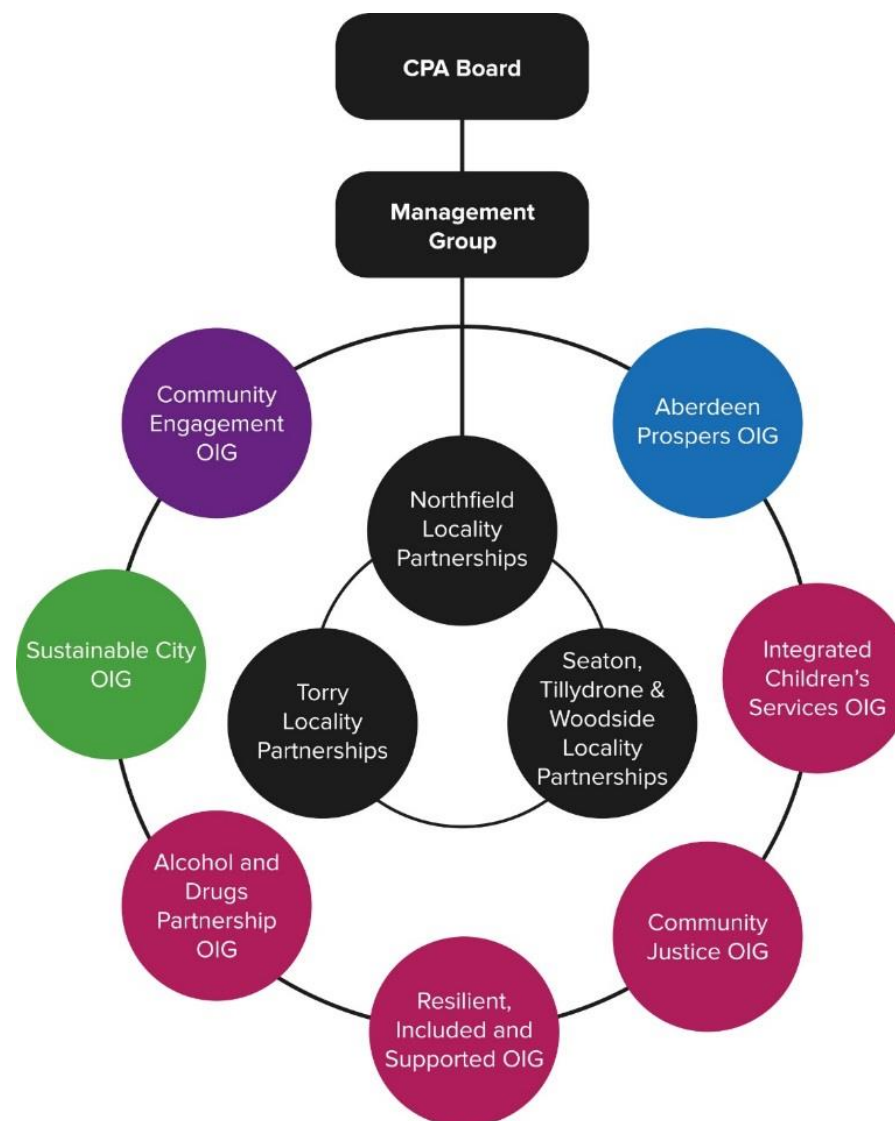

Community Planning Aberdeen Accountability Structure

The CPA Board provides strategic leadership and direction for Community Planning across Aberdeen. It will scrutinise overall delivery of progress against this Local Outcome Improvement Plan (LOIP) and the underpinning Locality Plans to ensure improved outcomes across all areas of Aberdeen.

The CPA Management Group is accountable to the CPA Board and oversees the delivery of progress by our seven themed Outcome Improvement Groups.

These groups facilitate effective joint working across Community Planning partners and with communities to ensure delivery of the LOIP and locality plans remain on track, and to advise the CPA Board of any additional action required to overcome barriers.

Locality Partnerships oversee the delivery of Locality Plans with communities to ensure that improved outcomes are being achieved for our most disadvantaged communities in Aberdeen.

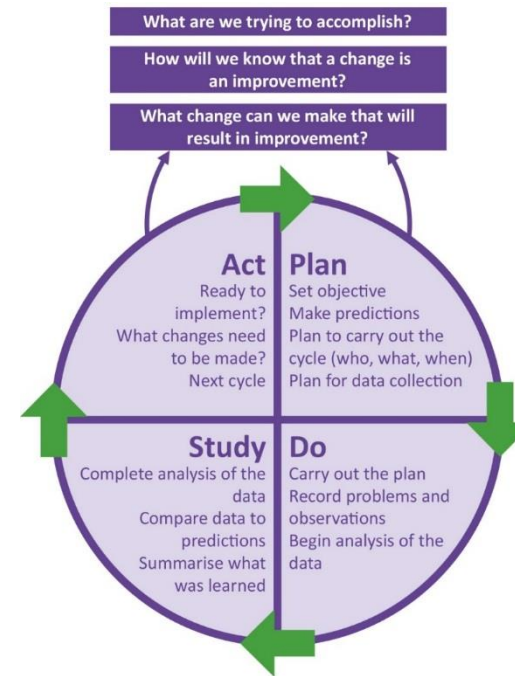

Improvement and Innovation

CPA will use Quality Improvement (QI) and the Model for Improvement framework for driving improvement activity across the Partnership. This provides us with a systematic approach to improvement which focuses on doing things better at the system level. It can be used for any area of business and is designed to break down change into manageable chunks. Each change idea is tested to make sure that actions taken are leading to improvement. Designed by the Institute of Health Improvement (IHI), this approach is used widely across Scotland as part of the [3 Step Improvement Framework for Scotland's Public Services](#).

In line with the methodology, initiation of every improvement project listed in this LOIP commence on approval of a project charter. The project charter sets out specifically what we are trying to achieve, by how much and by when. It includes the business case for undertaking the improvement project, drawing on national research to evidence how it supports prevention and early intervention to maximise the use of future resources. Using data is an essential component of the methodology and charters outline the range of process, output and outcome indicators which will be used to assess performance improvement.

To support staff to use the improvement methodology we have developed a comprehensive 'Innovate and Improve' programme to build capacity and capability in QI and the Model for Improvement across our Partnership and Communities. The programme is led by an Improvement Faculty consisting of members from across the Partnership who are committed to sharing their knowledge and expertise in Quality Improvement.

Evaluation and performance management

Ultimately, improving outcomes will be the test of our success. We have included a carefully chosen list of improvement measures and aims within this document. However, in some areas, for example the early years work, the results may take up to five years to demonstrate success in achieving longer term significant outcomes. It is therefore critical that we use evidence based self-evaluation to ensure we are measuring the impact and outcomes we are having in taking forward this plan. As part of our performance management arrangements we will produce an annual performance report detailing progress against this plan.

CHANGE LOG

This change log provides record of all approved changes made to the Local Outcome Improvement Plan following approval of the original document by the Community Planning Aberdeen Board on 22 August 2016. Significant changes to the LOIP require approval by the CPA Board prior to incorporating into the document. The latest versions of the LOIP is available online at www.communityplanningaberdeen.org.uk.

Version	Changes	Page Number	Approved By	Date
1	Local Outcome Improvement Plan.	1-34 and 42-61	CPA Board	22 August 2016
2	People are resilient, included and supported when in need section added.	35-41	CPA Board	12 December 2016
	Updated governance and accountability structure following approval of the Final Report for the Review of CPA Infrastructure.	59	CPA Board	12 December 2016
3	Priority community justice drivers incorporated into People are resilient, included and supported when in need section.	35-41	CPA Board	24 April 2017
4	Amendments as proposed in 2016/17 Annual Outcome Improvement Report pages 81-82.	16-59	CPA Board	4 December 2017
5	Refresh of Local Outcome Improvement Plan 2016-26 following revised Population Needs Assessment 2018. The refresh introduces 15 new Stretch Outcomes which clearly quantify the scale of Partnership's ambition to address key issues. The refresh also includes the specific improvement project aims that Outcome Improvement Groups will be working towards in an effort to achieve our stretch outcomes. The Board was asked to approve these projects based on their confidence that these are the projects that will yield improved outcomes and scalable results.	1-55	CPA Board	26 February 2019

6	Removal of Improvement Project Aim 'Increase the number of 27-30 month reviews completed for eligible children by 5.2% by 2021' further to the decision of the CPA Board that this is a single system improvement project.	20	CPA Board	2 December 2019
	Improvement Project Aim 'Increase the number of people with autism who are supported to be in education, employment or training by 2021' amended to 'Increase the number of autistic people aged 16 to 25 who are supported into employment by 2021.'	38	CPA Board	2 December 2019
7	Improvement Project Aim 'Increase the number of Digital and ICT SVQ level 4 qualifications achieved by 10% by 2021.' amended to 'Increase the number of Distress Brief Interventions opportunities for people presenting to frontline services in distress by 10% by 2021.'	15	CPA Board	26 February 2020
	Improvement Project Aim 'Increase the number of distress brief intervention opportunities for people with mental health issues by 10% by 2021' amended to 'Increase the number of Distress Brief Interventions opportunities for people presenting to frontline services in distress by 10% by 2021.'	38	CPA Board	26 February 2020
8	Removal of Improvement Project Aim "Increase in the MMR vaccine uptake for children at 24 months by 3.9% by 2020. "	19	CPA Board	16 September 2020
