Changes Being Tested (Specify location/ test group)		Are our changes resulting in improvement?		
It was agreed by RIS board that due to challenges around Covid only 1 area of focus will be taken forward. This will focus on creating a smoke-free campus at NESCOL. The first action will be to gather baseline data from students using a questionnaire; this will give us information such as how many students smoke, a gender breakdown of smokers and reasons for smoking. A test of change will be developed from this.		As we have not been able to test any of our change ideas there is no evidence of improvement.
