

## 12.6 Blood Borne Viruses

Project Aim	Start Date	Testing End Date	Progress Scale																				
Increase opportunities for individuals who have been at risk of Blood Borne Viruses, being tested and accessing treatment by 2021. <b>Project Manager:</b> Lisa Allerton/ Simon Rayner, ACHSCP <a href="#">Project Charter Approved Feb 2020</a>	Feb 2020	April 2021	6- Testing																				
Changes Being Tested (Specify location/ test group)	Are our changes resulting in improvement?																						
As this project was approved just before COVID –19 we have been unable to progress due to restrictions in face to face activity, GP practices being closed to public, competing priorities and also BBV testing was not available. As testing resumes, we will start these tests and review how this can be done In the meantime we are doing a new test of change- Self testing kits to be delivered to those identified as requiring testing	Self-test DBST protocols that have been agreed with Pauline Dundas, her team at The Peter Brunt Clinic and with Fiona Raeburn. This is supported by Aberdeen City MCN. ADA are the pilot for this test of change and they have had just under 20 tests completed and returned. They have been dropping of the DBST kits to clients via Sharp Response to test themselves. They will begin to look at rolling this out to those dropping in to Needle exchange. Now that protocols and video have been developed this will be available to any open caseload clients and these will get delivered asap (along with the leaflet/access to the video to show how it's done) and get them their results/linked in to any treatment required.
